COMMUNITY BARTER MARKETPLACE

A web application that allows users to trade goods and services without money. It features a smart matching system to recommend barter deals, making exchanges fair and convenient.

🔗 *Key Features:*

• **User Profiles**: Create and manage personal accounts with wish lists and available items.
• **Smart Matching System**: Suggests potential barter deals based on user preferences and availability.
• **MongoDB Database**: Stores user data, items, and trade histories securely.
• **Simple UI**: Built with HTML, CSS, JavaScript, and Materialize CSS for ease of use.

🌍 *Why It Matters:*

• 🌿 **Promotes Sustainability**: Reduces waste by reusing goods.
• 🤝 **Fosters Community Connection**: Encourages direct exchanges within local neighborhoods.
• ♻️ **Supports Circular Economy**: Moves towards a system where resources are used more efficiently.
